Listing of Claims:

This listing of claims replaces all prior versions and listings of claims in the application.

1. (Currently Amended) A hydrogen absorbing alloy electrode obtained by adhering an electrode material consisting of hydrogen absorbing alloy powder and a binding agent composed

of a polymeric material to a current collector,

wherein an aqueous polymeric material except not including a fluorocarbon resin is

applied thereon, to form a coating layer, and a polymeric material in said coating layer is

different from the polymeric material in the binding agent.

2. (Previously Presented) The hydrogen absorbing alloy electrode according to claim 1,

wherein

the polymeric material in said coating layer is a copolymer comprising at least two

elements selected from the group consisting of acrylic acid ester, methacrylic acid ester, aromatic

olefin, conjugated diene and olefin.

3. (Previously Presented) The hydrogen absorbing alloy electrode according to claim 1,

wherein

the polymeric material in said coating layer is at least one element selected from the

group consisting of styrene-methacrylic acid ester-acrylic acid ester copolymer, ethylene-acrylic

acid ester copolymer, methacrylic acid methyl-butadiene copolymer, styrene-butadiene

copolymer and butadiene polymer.

Response under 37 C.F.R. §1.116 Attorney Docket No. 010829 Serial No. 09/893,703

- 4. (Original) The hydrogen absorbing alloy electrode according to claim 1, wherein the weight of said coating layer is in the range of 0.1 to 5 % by weight of the total weight of said coating layer, hydrogen absorbing alloy power and the binding agent.
- 5. (Original) The hydrogen absorbing alloy electrode according to claim 1, wherein the weight of said coating layer is in the range of 0.2 to 2 % by weight of the total weight of said coating layer, hydrogen absorbing alloy power and the binding agent.
 - 6-8. (Canceled)
- 9. (Original) An alkaline storage battery, wherein the hydrogen absorbing alloy electrode according to claim 1 is employed as its negative electrode.
